

Boundless Billing

"We chose Gotransverse as our strategic partner due to their industry-leading telecom and billing domain expertise."

-Saleem Bhatti, CIO Starz Play

A SaaS Monetization Platform that Supports Communications' Sophisticated Rating and Mediation Needs

Communications Billing Gurus

Founded by billing gurus with hundreds of years of collective experience in communications and enterprise billing, Gotransverse runs deep with monetization domain expertise. With the aid of our expert implementation team and solutions architects, along with quarterly business reviews from our customer success team, you can trust that your billing needs will be taken care of every step of the way.

Limitless Monetization Models

Gotransverse specializes in sophisticated pricing models and can accommodate any customer seeking to take advantage of one-time, subscription, and consumption-based pricing. An advanced rating engine with in-house mediation that can correlate, aggregate, augment and transform data at breakneck speed is a key tool for any communications provider striving to make it ahead in the industry. From tiers to prepaid to multivariable pricing, Gotransverse provides its customers with any usage-based pricing solution they need in near real-time. Set up billing just the way you and your customers want it with our flexible billing platform.

Native Cloud Solution

Built as a native cloud SaaS solution, Gotransverse has the elasticity and parallel processing to scale with your business and requires no updates, being automatically streamlined with the most cutting-edge technologies and integrations. Our connector service supports out-of-the-box connectors to numerous common third-party tools, making it easy to plug into existing systems you have.

Low Cost

Platforms that meet the complex requirements of communications billing are generally very expensive. This is because the software is typically on-site and requires large servers to accommodate the high volume and processing needed to keep up with high-end mediation and rating. As a native cloud solution that can expand and contract with data pulled over the platform, Gotransverse passes the cost savings on to our customers so they can get all the functionality they need, minus the big bill.
